**A High Wind Warning is in effect for Guadalupe Pass late this evening through tonight.**

## Severe Thunderstorm Potential Today

Timing: 5 PM to Midnight

Weather Forecast Office  
Norman, OK  
Issued May 03, 2021 8:02 AM CDT

NWSNorman

weather.gov/norman

**Severe thunderstorms are possible this afternoon into this evening across eastern and southern Oklahoma and north Texas. There is the potential for hail up to the size of baseballs and thunderstorm wind gusts of 60 to 80 mph. The tornado risk is still very low and generally confined to southeast Oklahoma.**

# Hazardous Weather

Severe storms will be possible this evening and early tonight across the northern Big Country, to the north of a Hamlin to Albany line. Potential hazards include large or very large hail, and frequent lightning.

Thunderstorms are expected to move into our northwest zones later this evening through the overnight hours with some of these storms becoming severe. A Slight Risk covers all of the I-30 corridor with a Marginal Risk extending slightly farther southeast. The primary threats with any severe storms will be damaging winds and large hail. While the overall threat will be lower, an isolated tornado also cannot be ruled out.

# Hazardous Weather

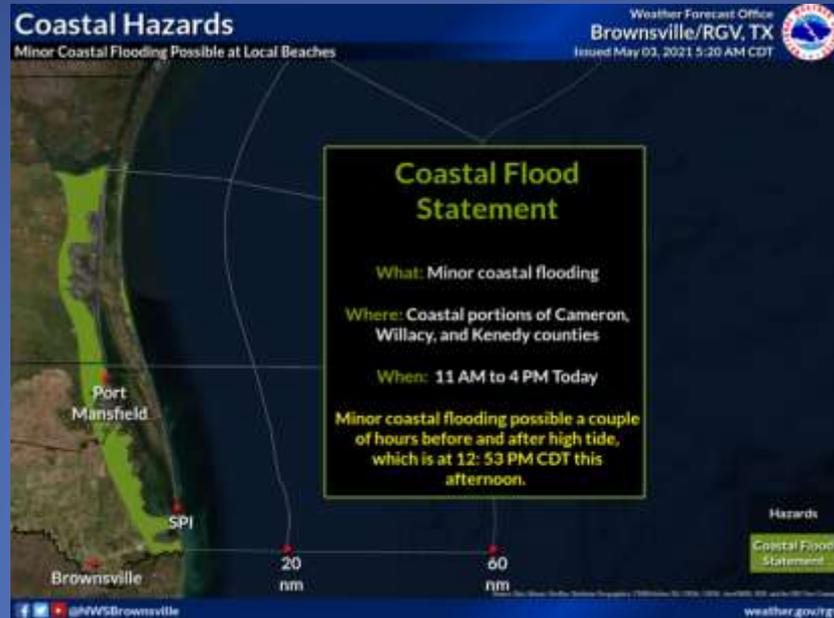

Widespread strong to severe thunderstorm development is possible Tuesday from the lower Mississippi and Ohio Valleys into the Allegheny and Cumberland Plateau regions. This will include a risk for large hail, damaging wind gusts and perhaps a couple of tornadoes.

A Coastal Flood Advisory is in effect from 9 AM through 9 PM for the Middle Texas Coast. Poor driving conditions are expected as water reaches the dunes, mainly near the times of high tide. Some beach access roads will become impassable.

# Hazardous Weather

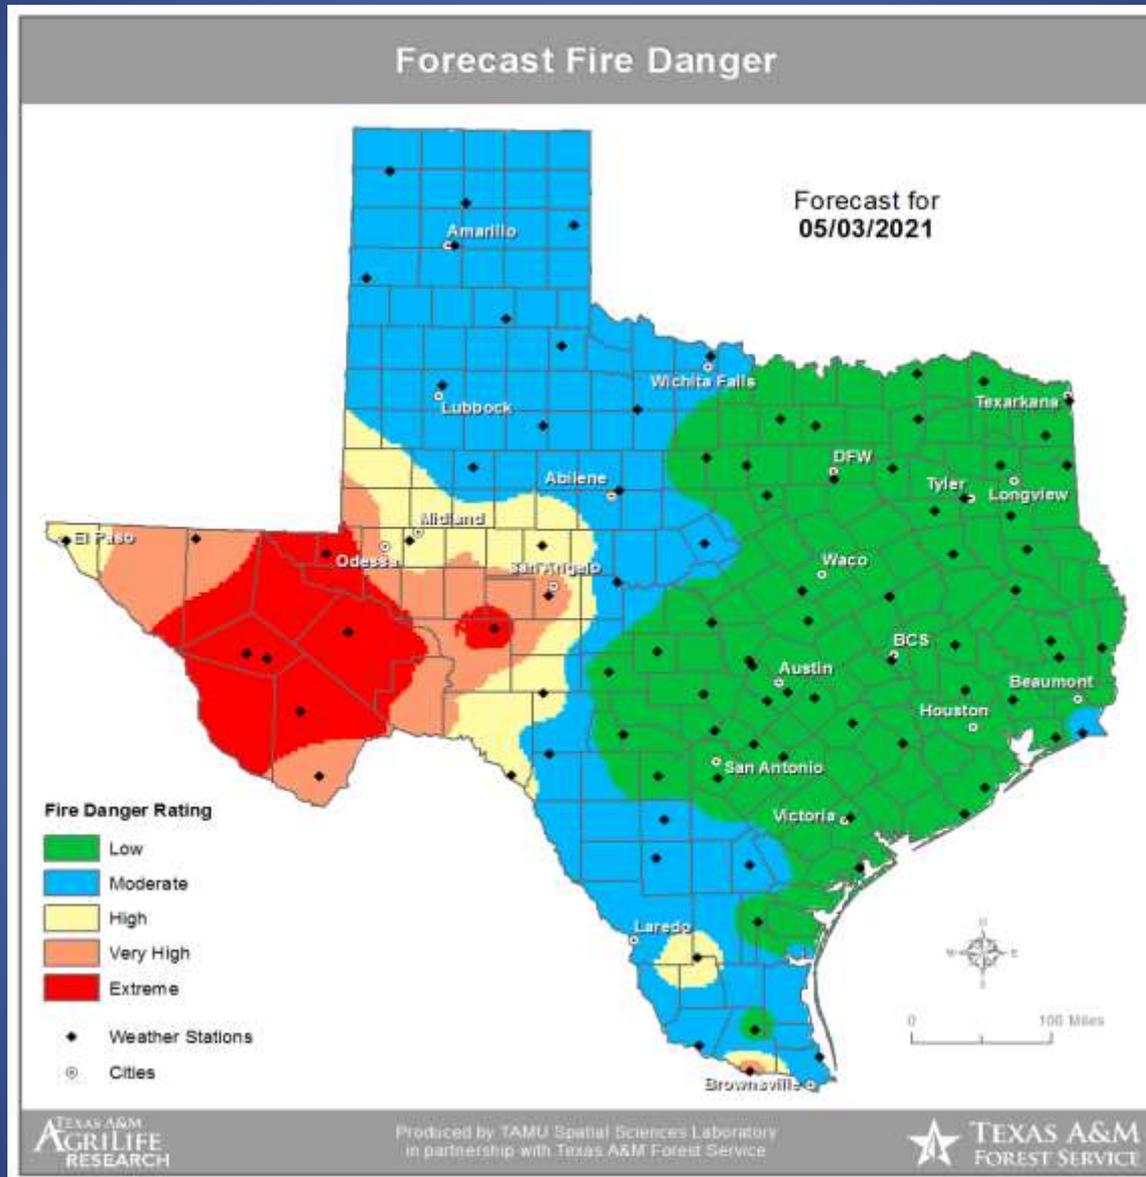

Minor coastal flooding is possible for a few hours at the local beaches around high tide today due to the combination of seas and tides.

# Weather Warnings/Advisories Issued

<b>DATE</b>	<b>WARNING TYPE</b>	<b>LOCATION</b>
05/02/21	Flood Advisory	Waller County
